<sup>1</sup> With the purchase of this Pogo Energy product, you are supporting cleaner energy by offsetting 100% of your paid, annual usage with an equivalent amount of energy produced by renewable sources of generation in the United States. To accomplish this, Pogo Energy will purchase and retire renewable energy certificates (RECs) representing the environmental attributes associated with renewable energy generation for 100% of your paid usage. You will not have renewable energy from a specific generation facility delivered directly to your service address, but your choice of using this Pogo Energy product ensures that renewable energy equal to 100% of your paid usage is produced using renewable resources on an annual basis. Renewable resource availability varies hour to hour and from season to season, as does your use. We will rely on system power from the Texas ERCOT grid to serve your minute-by-minute consumption, and we will use RECs to ensure that enough of the applicable Pogo Energy blend is delivered to power systems in the United States to match your actual paid, annual usage. We may take up to three months following the close of a calendar year to make up any deficiency in a particular resource promised in connection your Pogo Energy product.

<sup>1</sup> Con la compra de este producto de electricidad de Pogo Energy, usted está apoyando la electricidad limpia mediante la compensación del 100% de su consumo de electricidad anual retribuida con una cantidad equivalente a la electricidad producida por fuentes de generación de electricidad renovable en los Estados Unidos. Pogo Energy comprara y retirara los certificados de energía renovable (CER) que representan los atributos ambientales relacionados con la generación de energía renovable del 100% de su consumo pagado. Usted no tendrá electricidad de una estación generadora específica enviada directamente a su dirección de servicio, pero su compra asegura que la energía renovable equivalente al 100% de su consumo de electricidad pagado se produce utilizando los recursos renovables en una base anual. La disponibilidad de recursos renovables varía de una hora a otra y de una temporada a otra, al igual que el consumo de nuestros clientes. Vamos a confiar en el poder del sistema de la red para servir el consumo a nuestros clientes minutos a minuto, pero usaremos RECS para asegurar que suficiente de la mezcla de electricidad de Pogo Energy aplicable sea entregada a los sistemas de energía en los Estados Unidos para que coincida con la compra actual de nuestros clientes anualmente. Podemos tomar hasta tres meses después del cierre de un año calendario para compensar cualquier deficiencia en un recurso prometido específico en conexión con el servicio eléctrico que usted elija.
